Synopsis

NOTE: You are purchasing a standalone product; MyEconLab does not come packaged with this content. If you would like to purchase both the physical text and MyEconLab search for ISBN-10: 0134047346/ISBN-13: 9780134047348 . That package includes ISBN-10: 0133836797 /ISBN-13: 9780133836790 and ISBN-10: 0133862518 /ISBN-13: 9780133862515. For courses in Money and Banking or General Economics. An Analytical Framework for Understanding Financial Markets The Economics of Money, Banking and Financial Markets brings a fresh perspective to today's major questions surrounding financial policy. Influenced by his term as Governor of the Federal Reserve, Frederic Mishkin offers students a unique viewpoint and informed insight into the monetary policy process, the regulation and supervision of the financial system, and the internationalization of financial markets. Continuing to set the standard for money and banking courses, the Eleventh Edition provides a unifying, analytic framework for learning that fits a wide variety of syllabi. Core economic principles organize students' thinking, while current real-world examples keep them engaged and motivated. Closely integrated with the text, MyEconLab offers students the ability to study and practice what they've learned. Students can watch over 120 mini-lecture videos presented by the author, work problems based on the latest data in the Federal Reserve Bank of St. Louis's FRED database, and more. Also available with MyEconLab® MyEconLab is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them better absorb course material and understand difficult concepts.

If you're an independent learner; that is, not enrolled as a student in a course at a school, OR IF YOU ARE, BUT THE INSTRUCTOR IS NOT PARTICIPATING (Using the MyEconLab software for course materials), and thus can't provide you with a COURSEID, a warning about the MyEconLab study aid attachment to this textbook; the instructions for registering to use MyEconLab are less than candid. They just say that without a CourseID you can still access "most of the online resources listed." You are directed to a generic Mishkin web site instead of registering at the main MyEconLab portal. Being an honest person, I used the alternate registration. I was still asked for the ZIP for my school; I used my own. I then got a list of local schools or "Other" to choose from. I chose other, and entered "Independent Learner". The registration then completed; the confirmation stated it is only good for SIX MONTHS. If you go to the main MyEconLab Web portal shown in the user manual after registering as a non-student, your user ID will not be recognized. You have to use a generic portal for the Mishkin textbook instead. What you get there is: e-textbook, glossary, FLASH animated graphs, chapter quizzes and Web links from the textbook margins. The Weekly news selection (web links, so may expire; earliest was Aug. 2004) The "Chapter Readings" in journals, etc. (ditto above) Since these can expire at their parent web sites, I suggest you take the precaution of printing them out (I use Acrobat to make PDF files or download PDF files if available at the source). Also check out any links in the articles and do the same. The Readings are probably the best of what you DO get, along with the animations and quizzes.
