Deception Point: A Novel

Synopsis

When a new NASA satellite spots evidence of an astonishingly rare object buried deep in the Arctic ice, the floundering space agency proclaims a much-needed victory...a victory that has profound implications for U.S. space policy and the impending presidential election. With the Oval Office in the balance, the President dispatches White House Intelligence analyst Rachel Sexton to the Milne Ice Shelf to verify the authenticity of the find. Accompanied by a team of experts, including the charismatic academic Michael Tolland, Rachel uncovers the unthinkable: evidence of scientific trickery -- a bold deception that threatens to plunge the world into controversy. But before Rachel can contact the President, she and Michael are attacked by a deadly team of assassins controlled by a mysterious power broker who will stop at nothing to hide the truth. Fleeing for their lives in an environment as desolate as it is lethal, their only hope for survival is to find out who is behind this masterful play. The truth, they will learn, is the most shocking deception of all. In his most thrilling novel to date, bestselling author Dan Brown transports readers from the ultrasecret National Reconnaissance Office to the towering ice shelves of the Arctic Circle, and back again to the hallways of power inside the West Wing. Heralded for masterfully intermingling science, history, and politics in his critically acclaimed thriller *Angels & Demons*, Brown has crafted another novel in which nothing is as it seems -- and behind every corner is a stunning surprise. *Deception Point* is pulse-pounding fiction at its best. --This text refers to the Paperback edition.

Customer Reviews

"Deception Point" opens in Washington, DC, during a tight Presidential campaign. The incumbent, a man of strong principles, is a major NASA supporter. His opponent, who is basing his campaign on turning NASA into a private, non-governmental agency, thus saving the US taxpayer billions of dollars annually, is way up in the polls. He is also accepting enormous illegal campaign contributions from private aerospace companies who have billions to gain from the privatization of NASA. After many failures & much spending, NASA is badly in need of a success. Then a NASA satellite detects a large, high-density rock buried 200 feet below the Milne Ice Shelf on Ellesmere Island, high in the Arctic Circle. NASA scientists determine the rock to be a meteor containing fossils proving that life exists elsewhere in the universe. To verify the authenticity of the find, the White House sends a team of independent experts to the NASA habisphere, built over the meteor in the Arctic Circle. One of these experts is the intelligence analyst Rachel Sexton, the daughter of Senator Sedgewick Sexton. Senator Sexton is the man running for election against the President of the United States. The plot thickens. Rachel, while in the Arctic, uncovers what could be scientific trickery - an incredible deception that could cause political and scientific upheaval and cost the President his bid for re-election. When she & her colleagues attempt to investigate further, they are plunged into life threatening danger. To escape assassination they flee for their lives. Their only hope for survival is to discover who is behind this extraordinary plot and expose the truth. Dan Brown has proven to be one of the top writers in the suspense-thriller genre.

After reading the INCREDIBLE 'Da Vinci Code' and the equally exciting 'Angels & Demons' I figured I couldn't go wrong with 'Deception Point' and I was 100% RIGHT. Dan Brown is fast becoming one of my all-time favorite authors. After becoming familiar with Brown's religious thrillers, I was pleasantly surprised to find out that 'Deception Point' was entirely different--but JUST as much fun. If you enjoy stories about conspiracies that are as big as they come, this story is definitely for YOU. Rachel Sexton works for the Intelligence Community compiling information for the President. The odd twist in this story is that we are coming up on election time and the man poised to snatch the White House from under the feet of current President Zach Herney is none other than Rachel's own estranged Father, Senator Sedgewick Sexton. It takes some time to figure out who is indeed the bad guys in this tale--and trust me, you will probably be wrong anyway--but finding out certainly IS a great deal of the fun here. Rachel is contacted by the President and asked to confirm for his current staff the existence of a Meteor found near the Top of the World. Not just ANY Meteor, either. At first Rachel is stunned that the President would be so forward and ask this of the daughter of his biggest rival. Senator Sexton has been THE single largest thorn in the side of NASA because of

their chronic overspending and multi-billion dollar failures--screw-up's that have cost the American taxpayers dearly over the years. President Herney has been one of NASA's biggest supporters, much to his own detriment in the polls lately. Rachel actually HAS been chosen specifically because of her relationship to his rival to make this report.
