Music Of Many Cultures: An Introduction

Synopsis

From the rear cover of this 434 page book: "The foremost authorities in the field of music from around the world have contributed twenty original essays for this volume, edited by Elizabeth May. Only European musics have been omitted, except insofar as they affect other musics discussed here. North American music is represented by musics of Native Americans and the Alaskan Eskimos. The essays are profusely illustrated with maps, drawings, diagrams, photographs, and music examples. There are extensive glossaries, bibliographies, and annotated film lists. This book is directed to readers seriously interested in acquainting themselves with musics beyond the confines of Western musicology." This book is, I think, basically designed to be a college text on non-European music. If you're like me, you've been out of college quite a while, but I think you'll find this to be a useful reference volume if you're interested in alternative musical traditions. Perhaps it's my imagination or simply my idiosyncratic point of perspective, but I believe that there has been an increase of interest in non-western music over the last couple of decades. My perspective is that I'm too old for the top 40,

not interested in listening to the music I grew up with (it was bad enough listening to some of that stuff the first time!) and find that the classical station gets more banal each day. This book will help you to understand the subtleties of non-Western traditions, whether it be types of Indian ragas to use at different times of day, the normal arrangement of pieces in a traditional Arab presentation or the significance of variations in musical style in Japanese court music as opposed to the Kabuki theatre. Three stars, of course, is lukewarm praise, and there were various features of the book that I was not thrilled with, although some of them were unavoidable. The book is an edited collection of essays by various academics, and the quality is uneven. Some of them seem to almost be too thorough, and get bogged down in detail (Iranian, Japanese). Some are too sketchy (West African, Peruvian). Some just aren't there (other Native American). A couple seem to have provided an opportunity for the writer to air his or her pet projects (Chinese). Perhaps out of a jealousy to guard their preserves, most of the articles studiously avoided talking about cross-cultural influences (e.g., Arabic music on Iranian - or is it the other way round?
